## **FY AND Q4 2025 OPERATIONS UPDATE - AMENDMENT**

### **ACG METALS LIMITED**

Released 11:45:26 19 January 2026

RNS Number : 4570P

ACG Metals Limited

19 January 2026

19 January 2026

### **ACG METALS LIMITED**

**("ACG" or the "Company")**

### **FY and Q4 2025 Operations Update**

#### **ACG Metals Exceeds Guidance with Sulphide Project on track**

ACG Metals Limited is pleased to announce its operations update for the fourth quarter of 2025 ("Q4 2025") and financial year ("FY 2025").

Artem Volynets (Chairman and CEO) and Patrick Henze (CFO) will provide a live presentation via Investor M on 26 Jan 2026, 12:00 GMT. To attend, investors can join via this link: <https://www.investormetcompany.com/limited/register-investor>

The Company finished the year with an LTIF of 0.66 including 1.6 M man-hours worked LTI free.

ACG delivered a strong finish to 2025, exceeding production guidance with 39.2 koz AuEq produced (3% over) and 39.5 koz AuEq sold during the Gediktepe mine's first full year under ACG's ownership. Operational efficiency controls drove a 18% reduction in C1 cash costs to US\$499/oz AuEq. AISC increased to US\$1,244/oz AuEq for year-on-year, driven by the increases in gold and silver prices, resulting in higher royalty payments.

The Company is pleased to announce its 2026 production and AISC guidance at 20 - 22 ktpa CuEq production, 17.5 koz AuEq of oxide production stacked and presently under leach. AISC are expected to be at approximately US\$2.60/lb CuEq in this transformational year for ACG Metals. The oxide production cost will significantly be reduced royalty rate with EMX Royalty Corporation (2.25% this year vs 10% last year).

The Gediktepe Sulphide Expansion Project advanced significantly during the year and is on time and on commercial production by the end of H1 2026, transitioning ACG into a copper producer.

The Enriched Ore Treatment Project at Gediktepe mine is targeting an additional c.57kt CuEq from enriched stockpiles on site over a four-year period. In Q4 2025 the Company completed a scoping study and basic Permitting, metallurgical test works, and detailed engineering will commence in Q1 2026.

ACG's net debt as of December 31, 2025 was US\$65 million.

**Artem Volynets, Chairman and CEO of ACG, said:**

*"We are proud of our consistent outperformance last year, demonstrating the exceptional operating capabilities of*

*ACG is well positioned to complete the transition to a copper producer this year, with Sulphide Project constructed and on time, while continuing to benefit strongly from the production of gold and silver from the residual oxide ore*

*We are making great progress on our strategy to establish ACG Metals as a leading growth copper company on track*

## FY 2025 Operating Summary

|                          |       | 2025    | vs 2024 |                       |
|--------------------------|-------|---------|---------|-----------------------|
| Total Ore Mined          | t     | 351,723 | -51%    | <b>Mining</b>         |
| Au Grade                 | g/t   | 2.26    | 4%      |                       |
| Ag Grade                 | g/t   | 75.4    | 21%     |                       |
| Total Ore Processed      | t     | 354,472 | -56%    | <b>Process</b>        |
| Au Grade                 | g/t   | 2.56    | 1%      |                       |
| Ag Grade                 | g/t   | 94.0    | 31%     |                       |
| Au                       | oz    | 32,516  | -31%    | <b>Production</b>     |
| Ag                       | oz    | 587,947 | -17%    |                       |
| AuEq                     | oz    | 39,188  | -29%    |                       |
| Au                       | oz    | 32,884  | -33%    | <b>Sales</b>          |
| Ag                       | oz    | 570,870 | -15%    |                       |
| AuEq                     | oz    | 39,416  | -31%    |                       |
| Au                       | \$/oz | 3,321   | 39%     | <b>Realised Price</b> |
| Ag                       | \$/oz | 37.69   | 32%     |                       |
| C1 Cash Costs (produced) | \$/oz | 499     | -18%    | <b>Cost</b>           |
| AISC (sold)              | \$/oz | 1,244   | 9%      |                       |

## Safety And Sustainability

Safety culture continued to strengthen in 2025. The Company finished the year with an LTIF of 0.66. This included one time incident sustained by a contract employee for a total of 1.6 M man-hours worked. Efforts remain focused on contractor workplace safety as the construction workforce peaks in H1 2026.

Progress continued to position ACG for superior ESG performance. The inaugural annual

Sustainability Report nears completion and will be published with the annual report in April. The Company is completing a comprehensive compliance review in Q1 2026, including updating existing and introducing compliance policies, consistent with its commitment to ensure the highest standards of corporate governance.

## Oxide Operation

- FY2025 total ore mined was 351,723 tonnes, down 51% from 2024, reflecting natural sequencing of production plan
- Average grades improved, with gold at 2.26 g/t (+4%) and silver at 75.4 g/t (+21%), supporting high delivery.
- Ore processed totalled 354,472 tonnes, a 56% decrease year-on-year, as oxide stockpiles were drawn during sulphide expansion.
- Processing grades strengthened further, with gold at 2.56 g/t (+1%) and silver at 94.0 g/t (+31%).
- Operational efficiency throughout 2025 delivered a 25% reduction in C1 cash costs, decreasing from AuEq to US\$455/oz AuEq.
- FY2025 AISC remained broadly stable at US\$1,133/oz AuEq, down 1% year-on-year, as higher price-lin offset the benefits of lower operating costs during a period of stronger metal prices.

## Gediktepe Sulphide Expansion Advancing at Pace

The Gediktepe Sulphide Expansion Project delivered significant progress in Q4 2025, achieving key construction equipment milestones while remaining firmly aligned with its development schedule.

- Primary crusher foundations completed, structural steel erected, and major components installed including crusher, ROM feed bin and feeders.
- Ball and SAG mill foundations finalised, with structural steel erection for the mill building underway.
- Flotation and filter building foundations completed, and earthworks for the tailings storage facility per schedule.
- All flotation tanks, scavenger cells and cleaner cells delivered to site, alongside 1,300 tonnes of structural steel for the planned 1,700 tonnes.
- SAG and ball mills completed and ready for factory testing by year-end 2025, with rubber lining scheduled for January 2026.

As of 31 December 2025, the project remained firmly on schedule with engineering 68% complete, procurement construction 37%, concrete poured 86%, and 80% of long-lead items delivered. The Gediktepe Sulphide Project remains on track for commercial production by the end of H1 2026.

## Enriched Ore Treatment

ACG successfully delivered on its commitment to identify a method of unlocking potential value from enriched oxide stockpiles at Gediktepe. The company completed a scoping study and basic engineering in 2025. Commissioning of gold and silver recovery is planned for Q4 2026. In 2028, Phase 2 will commence recovering copper and zinc precious metals. The project is expected to unlock an additional c.57kt CuEq over 4 years.

## Capital Structure Highlights

ACG's net debt as of December 31, 2025 was US\$65 million and a cash balance of \$144 million (including a balance of \$46 million, and \$43 million sulphide cash balance).

Post 2025 year-end, the January 2026 coupon in respect of the US\$200 million Nordic bonds issued by AGL Limited has been paid in full, and the group is in full compliance with its bond terms.

## Inside information

The information contained within this announcement is considered by the Company to constitute inside information as stipulated under the Market Abuse Regulation (EU) No.596/2014 (as it forms part of UK domestic law by European Union (Withdrawal) Act 2018). On the publication of this announcement via a Regulatory Information Service, the information is now considered to be in the public domain.

## Forward looking statements

This announcement may contain certain "forward-looking information" and "forward-looking statements" (collectively referred to as "**forward-looking statements**"). Forward-looking statements are identified by their use of terms and phrases such as "believe", "targets", "expects", "aim", "anticipate", "project", "would", "could", "envisage", "estimate", "intend", "plan", "will" or the negative of those, variations or comparable expressions, including references to assumptions. Forward-looking statements in this announcement are based on current expectations and are subject to known risks and uncertainties that could cause actual results, performance and achievements to differ materially from those expressed or implied by such forward-looking statements. Factors that may cause actual results to differ materially from those expressed or implied by such forward-looking statements are based on numerous assumptions regarding the present and future business strategies of the Group and the environment in which it is and will operate in the future. All subsequent oral or written forward-looking statements attributed to or by any persons acting on its behalf are expressly qualified in their entirety by the cautionary statement above. This forward-looking statement speaks only as of the date of this announcement. Except as required by applicable law,

requirement, the UK Listing Rules and the Disclosure Guidance and Transparency Rules, neither the Company party intends to update or revise these forward-looking statements, whether as a result of new information, but otherwise.

The person responsible for the release of this information on behalf of the Company is Artem Volynets, Executive Officer.

**About the Company**

ACG Metals is a company with a vision to consolidate the copper industry through a series of roll-up with best-in-class ESG and carbon footprint characteristics.

In September 2024, ACG successfully completed the acquisition of the Gediktepe Mine which is transition to primary copper and zinc production from 2026 and will target annual steady-state copper production of 20-25 kt. Gediktepe sold 57koz of AuEq in 2024.

ACG's team has extensive M&A experience built through decades spent at blue-chip multinationals. The team brings a significant network as well as a commitment to ESG principles and strong governance.
